CORBAN MAILLOUX

Staff Software Engineer

(413) 522-7625 jobs@corb.co https://corb.co Amherst, MA corbanmailloux

SUMMARY

Technical leader and engineer with over a decade of experience in SaaS engineering, operations, and security. Led cross-cloud migrations, system re-architecture, and incident response for critical production systems, pairing hands-on delivery with modern development practices and project planning.

EXPERIENCE

Broadcom Nov 2023 – Jul 2026

Staff Software Engineer

- Led the design and execution of a major cross-cloud SaaS migration with minimal downtime, including the replacement of vendor-specific systems with open-source and custom software
- Implemented monitoring systems and incident response processes for critical systems, improving system stability and visibility
- Re-architected an aging data platform layer to add event-based ingestion and customer-visible status for long-running tasks, reducing the most visible delays from over 5 minutes to less than 30 seconds
- Optimized deployed systems for scale and cost optimization
- Partnered with operations teams to repackage SaaS systems as a customer-managed, deployable stack, expanding offerings to new customer segments and reducing recurring costs

VMware, Inc. 2017 – 2023

Senior Software Engineer / Tech Lead Nov 2020 – Nov 2023

Software Engineer Jul 2017 – Nov 2020

- Built and maintained multiple data ingestion and reporting pipelines processing millions of jobs per minute
- Designed and developed a patent-pending method of data ingestion, reducing per-project developer time by 80%
- Communicated project and team status with project and people management teams
- Managed intern projects and assessed intern performance
- Trained new team members, developing training curricula and traveling internationally to deliver them in person
- Contributed to security and penetration testing reviews of production systems

EnerNOC Jan 2016 – Dec 2016

Software Engineering Intern

- Built identity and access management APIs for use in customer-facing applications
- Collaborated across teams and roles to ensure secure use of the access control APIs
- Configured and integrated with the ForgeRock Identity Platform

Mobius Works, LLC May 2013 – Jan 2016

Junior Developer

- Worked with customers to establish complete requirement documentation and estimates
- Developed custom software and integrations in C# and Progress 4GL/OpenEdge ABL
- Created large-scale tax and credit card processing integrations for ERP software
- Traveled on-site to work directly with customers to develop complete solutions

EDUCATION

Rochester Institute of Technology Bachelor of Science • magna cum laude

Software Engineering major, Communications minor, Computer Security application domain 2012 – 2017

SKILLS

Technical

Go, Ruby, Java, Software Security, Software Documentation, AI-Enhanced Development

Professional

Professional Communication, Incident Management, Project Estimation and Planning
